Re: CC Docket No. 94-102

Bravo Cellular, L.L.C., Cellular

Radiotelephone Service Station KNKQ 443;

Report on Implementation of Wireless E911 Phase II

Automatic Location Identification

Dear Ms. Salas:

On behalf of Bravo Cellular, L.L.C., the following report concerning its plans for implementation of wireless Enhanced 911 (E911) Phase II automatic location identification (ALI) systems is being submitted.

1. Carrier Identifying Information: Bravo Cellular, L.L.C.

TRS No.: 818032

2. Contact Information: Larry S. Solomon, Esquire

Counsel for Bravo Cellular, L.L.C. Shook, Hardy & Bacon, LLP 600 14th Street, N.W., Suite 800 Washington, D.C. 20005

(voice) 202-783-8400 (fax) 202-783-4211 e-mail: lsolomon@shb.com 3. Type of Technology:

Bravo will employ a handset-based phase II location technology throughout its service territory. The handsets will employ GPS technology. At this time, Bravo intends to employ Nokia or Motorola handsets. Bravo has been informed that these handsets are not yet available.

4. Testing and Verification:

Bravo will use the test method prescribed by the equipment vendor and the Commission. Because it has not received handsets with the location technology, to date, no tests have been conducted.

5. Implementation details and schedule:

The implementation schedule will be in accordance with the dates specified by the Commission, provided the necessary equipment is available. Because Bravo is a small, independent carrier, necessary equipment may not be readily available. Additional time for implementation may be necessary.

6. PSAP Interface:

Hardware and software changes, and the schedule therefor, has not yet been determined. This will depend on information received from the equipment vendor.

7. Existing Handsets:

See Item No. 6 above. Bravo understands that Phase II ALI phones are not readily available. As a small independent operator, Bravo is not certain when the equipment will be available to it. Bravo may require additional time for implementation.

8. Location of Non-compatible handsets:

*See* Item Nos. 6 and 7 above. Bravo will follow the recommendations of the equipment vendors.

9. Other information:

Changes to the information provided herein may be made by Bravo. This report does not reflect a final commitment by Bravo. The Commission will be notified, in a timely fashion, of any changes.

Respectfully submitted,

BRAVO CELLULAR, L.L.C.

By: <u>/s/ Larry S. Solomon</u>
